

# Matthew Henderson

Ashburn, VA

[mattw2018@hotmail.com](mailto:mattw2018@hotmail.com)

I spent most of my high school career teaching myself programming in my free time and modding games that actually had some scripting language, like Python, embedded into them. After high school I got an apprenticeship at StealthPath Inc., where I developed a proper discipline around how I wrote code, and learned how to reach a level of writing proper production level code and writing the unit tests and Jira tickets that come with that. Even though I spend all of my work day programming, I still love programming enough to come home every day and work on pet projects.

Willing to relocate to: Falls Church, VA

## Work Experience

---

### **Intern**

Stealthpath Inc.

June 2018 to Present

I worked directly with a modified linux kernel and worked to try to find security vulnerabilities within the modified kernel, and then went on to help add onto to certain auxiliary projects, that were written in C++, that interacted with the modified kernel.

## Education

---

### **High school or equivalent**

## Skills

---

C++ (1 year), Python (3 years), Java (1 year), JIRA (1 year), Confluence (1 year), Git

## Assessments

---

### **Python Development Skills — Expert**

January 2019

Measures a candidate's ability to apply a fundamental understanding Python data types and structures to identify errors and create scripts.
