

Personal Information

Name: Muhammad Arslan
Address: House# 506, Street# 13, Sunfort Gardens Architect Society, Lahore
Date of Birth: 7 June 1995
Phone Number: +92 332 414 3220
E-Mail: arslananwar1994@gmail.com
LinkedIn: <http://linkedin.com/in/muhammad-arslan-629584a0/>
GitHub: <http://github.com/M-Arslan-Anwer>
Profile: **Software Developer**
To gain a dynamic and challenging role in the field of Information Technology that will offer me the best opportunity for further development of my abilities, skills and know ledge in an established company with long term career growth. Also very keen to learn new technologies.

Education

2015 - 2019 **National University of Computer and Emerging Sciences (FAST-NUCES)**
Bachelor's in Computer Science

2012 - 2015 **Punjab Group of Colleges**
Intermediate (Twelve years of schooling)

2010 - 2012 **The Punjab School**
Secondary (Ten years of schooling)

Experience

2019 - Present **Magnusmage**
Blockchain Developer

- To build programs using Hyperledger and generating restful APIs.

Projects

- Final Year Project**
- Final Year Project on **Blockchain** Based Secure **Web Portal** For Whistle Blowers Against Illegal Activities to minimize corruption
 - Front-End is done in **React** and integrated with Blockchain
 - **Hyperledger Composer** Blockchain is used for security of whistle blowers
 - **Ethereum** wallet will be used for sign up and log in
 - Users Interact with Blockchain network through React.Js
 - **React.js** will connect with **Hyperledger API** which allow user to login into Blockchain network
 - For file storing like images, videos and pdf we used **IPFS**, that will store file and generate its hash that will be stored in Blockchain network
- Natural Language Processing**
- **Fake Review Detection** applied **tf-idf**, **count vectorizer** to find unique features including **N-grams**
 - **SVM**, **naive bayes**, **Logistic regression** classifiers are used for Training and Testing.
- Machine Learning**
- **Android Malware Classification** uses apk permission to classify it into different malware families.
 - **Neural Network** algorithm is used for classification.

Training

- Udemy: Create Ethereum & Blockchain Applications Using Solidity.
- Udemy React the complete guide including redux.
